Please refer to the Trailblazer Home Medication Safety Indicator Instruction Book, available at <https://ismpcanada.ca/resource/ltc/measuring-and-evaluating/> for information on how to use this worksheet.

1. Do not identify any residents/family/staff in the worksheets submitted to ISMP Canada
2. These worksheets can be submitted confidentially to LTC@ismpcanada.ca

Worksheet 2 - Optional Indicators

Indicator	21Q4	22Q1	22Q2	22Q3	22Q4	23Q1	23Q2	Notes
Number of Adverse Medication Reactions per 100 beds per quarter								
Number of Usages of Rescue Medication per 100 beds per quarter								
Number of Emergency Box Medication dispenses per 100 beds per quarter								
Number of missing or unaccounted for controlled or targeted substances per 100 beds per quarter								
Other								
Other								
Other								
Other								

To calculate rate per 100 beds per quarter, take the number of events in the quarter, multiply by 100, then divide by the number of beds. Number per 100 beds per quarter = number in quarter X 100 ÷ beds
